

Figure 2. Impact of ending animal agriculture on atmospheric greenhouse gas levels.

(A) Projected annual emissions of  $\text{CO}_2$ ,  $\text{CH}_4$  and  $\text{N}_2\text{O}$  for Business as Usual and Plant Only Diet assuming an immediate cessation (solid lines) or 15 year transition (dashed line) to new diet. (B) Projected atmospheric concentrations of  $\text{CO}_2$ ,  $\text{CH}_4$  and  $\text{N}_2\text{O}$  under each emission scenario.
